# **MAI DINH TRUONG**

# Fullstack developer

Name Mai Dinh Truong

Birth 09/02/2003

Phone +84 889535303 Address Ha Noi, Viet Nam Email maidinhtruong113@gmail.com

## MY GOAL IN THE JOB

• **Short-term goal:** To gain hands-on experience as a Backend/Fullstack Intern, enhancing my technical skills and contributing to real-world projects.

• **Long-term goal:** To become a professional software developer, capable of designing and implementing scalable, high-performance systems with a strong focus on reliability and efficiency.

Portfolio: My Portfolio

# **Education**

10/2021-12/2025

Hanoi University of Industry (HaUI)

Major - Information Technology

### **Skills**

#### Frontend:

- HTML5, CSS3 (SCSS, TailwindCSS, Bootstrap 5)
- JavaScript (ES6+), ReactJS

#### Database:

- MySQL
- MongoDB (NoSQL)
- SQLite

#### Backend:

- Node.js (ExpressJS, RESTful API)
- Python (Flask, Tkinter)

#### **Tools & Others:**

- Git/GitHub
- Figma
- Postman
- Adobe XD

## **Projects**

#### 1: Clothing sales interface

GitHub	GitHub Frontend GitHub Backend
Descriptions	An e-commerce website for clothing that allows users to register, log in, browse products by category, add items to the cart, and place orders. The admin can manage products, orders, and user accounts.
Number of members	1
Position	Fullstack Developer (ReactJS + NodeJS + MongoDB)
Responsibilities	<ul> <li>Built user interfaces with ReactJS and SCSS (responsive design).</li> <li>Designed and developed RESTful APIs with ExpressJS for product management, order handling, and authentication.</li> <li>Integrated MongoDB for product and order data storage.</li> </ul>
Technology in use	ReactJS, SCSS, NodeJS (Express), MongoDB.

#### 2: NodeJS-food-app

Github	Link Github
Descriptions	A food ordering application built with Node.js following the MVC (Model–View–Controller) architecture. It provides essential functionalities such as user registration/login, password reset, browsing restaurants and food items, placing orders, and managing them. The admin interface allows managing users, restaurants, food items, and viewing all orders.
Number of members	1

Position	Backend Developer (NodeJS + Express)
Responsibilities	<ul> <li>Implemented user authentication (register, login, password reset).</li> <li>Developed CRUD APIs for restaurants and food items.</li> <li>Built order management features for users and admin.</li> </ul>
Technology in use	NodeJS (Express), MongoDB.

# 3: Portfolio

Link	https://protfolio-pi-steel.vercel.app/
Descriptions	My Protfolio
Number of members	1
GitHub	https://github.com/mdtdz113/My_protfolio
Technology in use	- Frontend: ReactJS (Html, Css, JavaScripts)
