- MySQL, NoSQL (MongoDB)
- Python(Flask)

Other
- Git/GitHub
- Fima
- Python(Tkinter)

Projects

NodeJS-food-app

(20/3-01/4/2025)

Github	https://github.com/mdtdz113/food_app_NodeJs
Descriptions	The project follows the MVC (Model-View-Controller) architecture in Express and includes dependencies such as color, nodemon, morgan, dotenv, and cors. It provides essential functionalities, including user registration and login, password editing and reset (forgot password), and the ability to view all restaurants and food items or filter them by ID. Additionally, users can edit and delete restaurant and food entries, place food orders, and manage ordered food, with an admin interface for viewing all orders.
Number of members	1
Position	Backend-NodeJs(Express)
Responsibilities	Backend-NodeJs(Express)
Technology in use	• Backend: NodeJs(Express), MongoDb

Clothing sales interface

(01/2025 - 03/2025)

GitHub	https://github.com/mdtdz113/ReactJs-DACN
